PETRA

Drawing inspiration from the elegance of natural stone, the Studio Petra series, with its refined grains, seamlessly integrates into both classic and modern design concepts, imparting a luxurious feel reminiscent of posh marble. The intrinsic beauty of natural stone is elevated through the meticulous detailing across 9 faces, introducing layers of sophistication to your spaces.

Studio Petra presents a diverse color palette including White, Ivory, Pearl, Grigio, and Nero. Tailor your projects with personalized touches using the 3 available finishes: R10 Matt, Polished, and Lappato.

Tailored for various ambiances and atmospheres, choose from 3 versatile formats: 60x60cm, 30x60cm, and 30x30cm. Surpassing the allure of natural stone, Studio Petra boasts a remarkable low water absorption rate of less than 0.5%, making it an excellent choice for projects in high-moisture environments.

Infuse your space with Studio Petra and embrace the unparalleled elegance of natural stone, adorned with a modern twist.

SHINE

Studio Shine Series, a collection of glazed porcelain tiles, takes its inspiration from the smooth elegance of Soft Slate stone.

Drawing inspiration from the natural essence of slate, this collection introduces a sophisticated porcelain stoneware that rejects artificial solutions in favor of exhibiting the results of extensive creative research through coordinated indoor and outdoor surfaces.

The new surface of the Shine Series reveals a dynamic graphic vitality, precise chromatic control, and carefully studied metamorphic features, all harmoniously balanced and, above all, authentic.

With a structured R10 and Lappato surface, featuring 12 distinct faces, this series adds a layer of depth and character to its overall aesthetic.

Available in a wide spectrum of colors, including Bianco, Beige, Perla, Moon, Cenere, and Anthracite, the Shine Series offers 3 formats — 60x60cm, 30x60cm, and 30x30cm, ensuring its adaptability for use on floors, walls, and as a feature element.

The tile also boasts a low water absorption rate of less than 0.5%, making it particularly suitable for spaces with elevated moisture levels. Each module within the Shine Series evokes unique sensations, showcasing the material's exquisite softness and revealing the mineral features and delicate characteristics reminiscent of split stone.
